Bottomland fields and woodlands near the river were inundated. GALLATIN COUNTY --- 1.1 SSW SHAWNEETOWN [37.69, -88.14], 1.0 SSW SHAWNEETOWN [37.69, -88.14], 0.2 ESE SHAWNEETOWN [37.70, -88.13], 0.2 SW SHAWNEETOWN [37.70, -88.13] 05/05/10 12:00 CST 0 Flood (due to Heavy Rain) 05/12/10 04:00 CST 0 Source: River/Stream Gage Minor flooding of the Ohio River occurred in the Shawneetown area, affecting mainly bottomland and surrounding low lying areas. A large storm system developed over the central Plains at the end of April. This brought several rounds of very heavy rain between April 30th and May 2nd. South of the Ohio River, rainfall amounts from 2 to 5 inches were widespread. Lesser amounts fell to the north. The lower Ohio River went above flood stage during the first week of May. The flooding was more significant downriver from the mouths of the Tennessee and Cumberland Rivers due to record rainfall in middle Tennessee. ALEXANDER COUNTY --- 0.5 ESE THEBES [37.22, -89.46], 0.3 SE THEBES [37.22, -89.47], 0.4 W GALE [37.25, -89.46], 0.1 SW GALE [37.25, -89.46] 05/16/10 08:00 CST 0 Flood (due to Heavy Rain) 05/30/10 15:00 CST 20K Source: River/Stream Gage Moderate flooding occurred along the Mississippi River around Thebes. The communities of Thebes and Gale experienced some flooding of low-lying areas. The flooding mostly affected agricultural bottomlands and woodlands. JACKSON COUNTY --- 1.5 W MT CARBON [37.75, -89.36], 1.5 WNW MT CARBON [37.76, -89.36], 2.3 WSW MURPHYSBORO [37.76, -89.37], 2.4 WNW MT CARBON [37.76, -89.37] 05/21/10 05:00 CST 0 Flood (due to Heavy Rain) 05/25/10 08:00 CST Source: River/Stream Gage Minor flooding occurred along the Big Muddy River in the Murphysboro area. Bottomland fields were flooded. Several cold fronts passed across the region in late May, helping to touch off scattered thunderstorms. A few of these storms were nearly stationary and caused heavy rainfall. Heavy rain in the upper portions of the Mississippi River basin contributed to the flooding downriver. Flooding along the Big Muddy River was mainly due to backwater from the flooded Mississippi. | | | | | |

Rainfall of 4.4 inches was measured 8 miles west of Rockport. Numerous county roads were closed.

A surface cold front extended from the Chicago area southwestward across the eastern fringes of the St. Louis area to a weak low pressure center over southeast Missouri. The low ejected northeast across southern and eastern Illinois, with the trailing cold front moving east across the Lower Ohio Valley. Over southwest Indiana, heavy rain was the main hazard with these elevated storms.

The tornado touched down southwest of Cayce and travelled northeast, mainly damaging trees. Damage near Cayce consisted of downed trees and limbs caused by the EF-0 tornado. Near Highway 924, the tornado increased to EF-1 intensity and caused some minor damage to houses and outbuildings. One mobile home was moved a few feet, and the roof was torn back. A boat on a trailer was flipped over. Anchored television antennas were pulled out of the

Severe flash flooding was reported in Princeton. Most streets in Princeton were under at least two feet of water. Police vehicles were unable to navigate the flooded streets, so officers used city street department trucks instead. Several vehicles that ventured into the flooding were disabled in floodwaters and had to be towed. Several homes were flooded with two feet of water, necessitating evacuations.

Date/Time Deaths & **Event Type and Details** Location Property & Injuries Crop Dmg Flood-prone Red Duck Creek overflowed its banks in Mayfield, flooding a few streets and causing significant damage to a house. Water was in several houses in Wingo, where several people were evacuated. Low-lying areas of Pryorsburg were flooded. There were road closures countywide, most of which were county roads. U.S. Highway 45 was closed between mile markers 1 and 2 in the Water Valley area. Near Pottsville, a bridge over Wilson Creek on Kentucky 945 was damaged by high water and debris that hit the bridge piers. The road was closed for an extended time. Kentucky 1124 between mile markers zero and one was closed due to a washed out cross drain. The state police post near Mayfield measured 3.82 inches. MARSHALL COUNTY --- 1.5 SSW BENTON [36.85, -88.36], 0.7 WSW BENTON [36.87, -88.36], 0.4 ESE BENTON [36.87, -88.34], 1.2 W DOGTOWN [36.85, -88.34] 05/02/10 02:27 CST 20K Flash Flood (due to Heavy Rain) 05/02/10 09:30 CST 0 Source: Emergency Manager In Benton, one lane at the intersection of Highway 58 and 10th street was closed due to a pavement washout. A storm-total rainfall from late on April 30th to early on May 2nd was measured at 7.80 inches in Hardin. MUHLENBERG COUNTY --- 1.5 ENE MORGAN [37.28, -87.14], 2.7 SSW NELSON [37.29, -87.06], 1.7 SW NELSON [37.31, -87.07], 1.3 S SOUTH CARROLLTON [37.31, -87.15] 05/02/10 03:00 CST 0 Flash Flood (due to Heavy Rain) 05/02/10 07:00 CST 0 Source: Law Enforcement A couple of roads were closed due to flooding, including one in Central City and another east of Central City. Several other roads remained open despite water over them. A trained spotter east of Rosewood measured total rainfall of 7.55 inches for the entire event from late on the 30th to early on the 2nd. DAVIESS COUNTY --- 2.3 WSW BOSTON [37.67, -86.96], 0.9 NW PHILPOT [37.74, -86.99], OWENSBORO [37.77, -87.12], 2.0 ENE CURDSVILLE [37.75, -87.30], 0.4 WNW MAPLE MT [37.68, -87.33] 05/02/10 04:00 CST 0 Flood (due to Heavy Rain) 05/03/10 18:00 CST 30K Source: Department of Highways A total of 24 county roads were closed due to high water. Kentucky Highway 762 was closed between mile markers zero and one. Kentucky 298 was closed between mile markers two and three. Several other state roads were closed. A large amount of cropland was flooded, about half of it planted. Much of the flooding in the county was due to the Green River, which crested at moderate flood levels in Mclean County. HENDERSON COUNTY --- GENEVA [37.82, -87.70], 2.1 WSW ZION [37.80, -87.51], 1.0 SE NIAGARA [37.71, -87.47], 1.9 WSW DIXIE [37.67, -87.71] 05/02/10 06:00 CST 0 Flood (due to Heavy Rain) 05/02/10 12:00 CST 0 Source: Department of Highways Kentucky Highway 812 was closed between mile markers two and four. Kentucky 1557 was closed between mile markers two and three. Several other secondary roads were closed throughout the county. Rainfall at Henderson was 4.5 inches. CHRISTIAN COUNTY --- HOPKINSVILLE [36.85, -87.48], 1.7 E HERNDON [36.73, -87.54], 1.0 ENE BARKERS MILL [36.67, -87.33], 2.2 N PEMBROKE [36.81, -87.35], APEX [37.10, -87.35], 0.8 WSW WYNNS [37.10, -87.39] 05/02/10 07:00 CST 20K Flood (due to Heavy Rain) 05/03/10 17:00 CST 0 Source: Department of Highways Kentucky Highway 189 was closed in the Apex area due to a landslide. Other roads in the Apex area were threatened by high water. Elsewhere in the county, a good number of roads were closed or barricaded. Water was over U.S. Highway 41, as well as Kentucky Highways 109, 115, and 345. Many secondary roads were under water. Many creeks were out of their banks, and lowlands were under water. MCLEAN COUNTY --- LIVERMORE [37.48, -87.13], 2.3 WSW BUEL [37.54, -87.22], 0.0 NE GLENVILLE [37.60, -87.20], 1.5 NNW NUCKOLS [37.54, -87.13] 05/02/10 07:00 CST Flood (due to Heavy Rain) 0 05/02/10 16:00 CST 0 Source: Department of Highways High water signs were posted at spots on three state highways: Kentucky 140, 1046, and 2110. No road closures were reported. MUHLENBERG COUNTY --- 1.3 W LYNN CITY [37.37, -87.25], LYNN CITY [37.37, -87.23], 0.7 E MERCER [37.25, -87.14], 1.9 E NEW CYPRESS [37.25, -87.22] 05/02/10 07:00 CST 0 Flood (due to Heavy Rain)

05/03/10 11:00 CST

Kentucky Highway 181 was closed between mile markers 12 and 13 due to flooding. Water was over U.S. Highway 431 and Kentucky Highway 70. Several other secondary roads were closed throughout the county. Considerable flooding of farmland took place, though much of it was not planted yet.

U.S. Highway 51 was closed between mile markers 4 and 6.

A surface cold front extended from the Chicago area southwestward across the eastern fringes of the St. Louis metro area to a weak low pressure center over southeast Missouri. The low ejected northeast across southern and eastern Illinois, with the trailing cold front moving east across the Lower Ohio Valley. A broken cluster of severe thunderstorms, with embedded supercells and small bow echoes, moved east-northeastward across western Kentucky. Increasing south-southwesterly low level winds brought plenty of moisture northward into the Lower Ohio Valley, aiding in sufficient destabilization for supercells. The two primary supercells of the night followed similar paths across southern parts of the Purchase area, the Lakes region, and the southern Pennyrile region. Heavy rainfall with the storms, in combination with saturated ground from the May 1 storms, produced localized flash flooding.

Moderate flooding of the Green River occurred in the Calhoun and Rumsey areas. Lower parts of Calhoun began flooding. A large portion of Rumsey was flooded. No mandatory evacuations were ordered, but firefighters went door-to-door in flood-prone neighborhoods in lower Calhoun, Rumsey, and the west side of Livermore. Around 60,000 acres of cropland were flooded in the Island, Rumsey, and Jewel City areas. About half of that land was planted, mostly with corn.

05/04/10 02:00 CST 0 Source: Emergency Manager

The Cumberland River rose rapidly as releases from Barkley Dam were increased to record levels. About a dozen residences were flooded in Dycusburg, and others were evacuated because they were isolated by floodwaters. The community that was primarily affected was Dycusburg. Water was two to three feet deep in some homes. There was extensive flooding of fields and woods. A few roads were closed, including State Route 295 at Dycusburg.

05/03/10 14:00 CST 0.25M Flash Flood (due to Planned Dam Release)

05/04/10 02:00 CST 10K Source: Emergency Manager

The Cumberland River rose rapidly as releases from Barkley Dam were increased to record levels. River levels rose at the rate of about one foot per hour. The tailwater elevation below the dam rose to around 350 feet. About a dozen residences were flooded, and about 10 others were evacuated because they were isolated by floodwaters. Vehicles and other equipment were damaged or destroyed by the rapidly rising floodwaters. The communities that were heavily affected were luka and the east side of Lake City. Sandbagging efforts helped avert damage to a few homes. A couple of houses on the outskirts of Tiline were flooded. There was extensive flooding of fields and woods. A number of roads were closed, including most of State Route 917 and State Route 93 near luka. A state of emergency was declared in the county. A Red Cross shelter was opened in Grand Rivers for displaced residents.

High water levels on Lake Barkley caused flooding of marinas, boat ramps, and lake access roads. Sandbagging was needed to protect a building at the Kuttawa Harbor Marina. All marinas on the lake were closed. Lake Barkley was closed to recreational boating by order of the Coast Guard. Water backed up into bays and tributary creeks, causing flooding inland from the lake. Most trails, roads, and camping facilities in the Land Between The Lakes National Recreation Area were closed.

High water levels on Kentucky Lake caused flooding of lakeshore docking facilities, boat ramps, and lake access roads. Hillman Ferry Campground within the Land Between The Lakes National Recreation Area experienced considerable flooding. Dozens of campsites were underwater, and a couple of roads were inundated. Water backed up into bays and tributary creeks, causing flooding inland from the lake. Most trails, roads, and camping facilities in the Land Between The Lakes National Recreation Area were closed. Large parts of the lake were closed to recreational boating per order of the Coast Guard.

High water levels on Kentucky Lake caused flooding of lakeshore docking facilities, boat ramps, and lake access roads. Many lakeshore resorts and campgrounds were closed due to flooding of their facilities. Marinas on the lake were closed, and some docks were damaged. Kentucky Dam Village State Resort Park experienced flooding of low-lying areas, including breakwaters. The Coast Guard closed parts of Kentucky Lake to all recreational boating.

TRIGG COUNTY --- 0.8 SW CANTON [36.79, -87.96], 1.9 NNE GOLDEN POND [36.80, -88.00], 1.4 S LAUREL FURNACE [36.68, -87.98], 0.3 SSW LINTON [36.68, -87.90]

High water levels on Lake Barkley caused flooding of marinas, boat ramps, and lake access roads. At Lake Barkley Marina, there was considerable damage to docks. Nine or ten roads were closed in the Linton area. A few houses in the Linton area were isolated by the swollen lake. No homes were threatened, but some lakeside residents were forced to detour around flooded roads. Water backed up into bays and tributary creeks, causing flooding inland from the lake. Most trails, roads, and camping facilities in the Land Between The Lakes National Recreation Area were closed. The lake was closed to recreational boating by order of the Coast Guard.

TRIGG COUNTY --- 4.1 WSW LAUREL FURNACE [36.68, -88.05], 2.3 NNW FENTON [36.81, -88.12], 3.2 NW FENTON [36.81, -88.14], 5.3 WSW LAUREL FURNACE [36.68, -88.07]

High water levels on Kentucky Lake caused flooding of lakeshore docking facilities, boat ramps, and lake access roads. Water backed up into bays and tributary creeks, causing flooding inland from the lake. Most trails, roads, and camping facilities in the Land Between The Lakes National Recreation Area were closed. The Coast Guard closed large parts of Kentucky Lake to recreational boating.

Record rainfall amounts of around 12 inches fell within 48 hours across parts of middle Tennessee. This rainfall resulted in record or near record stages on parts of the Cumberland River and Tennessee River, which flow into Lake Barkley and Kentucky Lake. Combined with the heavy rainfall across western Kentucky, record inflow poured into Kentucky Lake and Lake Barkley. Releases from Kentucky Dam and Barkley Dam were dramatically increased to compensate for the record inflow. Cumberland River elevations rose over 20 feet behind Barkley Dam as releases from the dam peaked at 303,000 cfs, surpassing the previous record. This caused flash flooding of communities below the dam. Releases were tapered down on the 5th as inflow into the lakes began slowing down. Inflow was still enough that pool levels above the dams (the lake stages) rose to near record levels. Lake levels rose to nearly 369 feet, almost 10 feet above the normal summer pool stage. There was widespread damage to docks and boat ramps along both lakes.

A marina and campground along Kentucky Lake sustained moderate to major damage from a microburst. One houseboat sank, and several other boats were damaged. The bow of a sailboat was wedged under a dock, and a pontoon boat broke away from its slip. Three piers were heavily damaged. Roofing material was blown off a restaurant, mainly on one side of the building. The canopy of an outdoor seating area was blown down. One of the marina's gas pumps was left partially underwater. Waves estimated about five feet high caused some of the damage. The damage area was about one mile long and one-quarter mile wide.

A few strong to severe storms occurred as daytime heating contributed to strong instability ahead of a southward-moving disturbance in the mid levels of the atmosphere.

 0
 Source: Law Enforcement

Highway 34 was covered with at least three to four inches of water. Several streets were covered with running water. Hurricane Creek was out of its banks.

Thunderstorms persisted from the evening of the 30th into the wee hours of the 1st ahead of an eastward moving cold front over the Ozark Mountains. Strengthening mid-level winds ahead of a strong shortwave trough over the central Plains aided storm development. Moderate instability combined with abundant moisture produced isolated excessive rainfall as the storms spread northeastward.

 Source: River/Stream Gage

Minor flooding of agricultural bottomlands and woods occurred along the Mississippi River at Cape Girardeau. The Mississippi River backed into several creeks, producing flooding of farm fields.

NEW MADRID COUNTY --- 1.6 SW NEW MADRID [36.58, -89.55], 0.9 SE HOWARDVILLE [36.57, -89.57], 2.2 WSW LINDA [36.41, -89.59], 0.9 SSE LINDA [36.41, -89.55]

05/05/10 08:00 CST 0 Flood (due to Heavy Rain)
05/15/10 18:00 CST 10K Source: River/Stream Gage

Minor flooding occurred along the Mississippi River near New Madrid. Mainly bottomland fields were affected. Highway 162 was closed in the river bottoms south of New Madrid.

A large storm system developed over the central Plains, bringing several rounds of very heavy rain to the region between April 30th and May 2nd. The Mississippi River flooding that occurred below its confluence with the Ohio River was due to large volumes of water coming down the Ohio from the Tennessee Valley. Record rainfall occurred in parts of the Tennessee Valley in early May.

BUTLER COUNTY --- 5.8 WSW HENDRICKSON [36.87, -90.58], 5.3 WSW HENDRICKSON [36.88, -90.57]

The flood gates on Broadway and on Themis Street were closed. Agricultural bottomlands were flooded. River access roads and parks were closed and flooded. PERRY COUNTY --- 0.4 ESE WITTENBURG [37.65, -89.52], 0.2 NNE WITTENBURG [37.65, -89.53], 1.0 W WITTENBURG [37.65, -89.55], 1.0 WSW WITTENBURG [37.64, -89.55] 05/15/10 14:00 CST 0 Flood (due to Heavy Rain) 05/30/10 14:00 CST Source: Newspaper Moderate flooding of the Mississippi River occurred. Highway A was closed between County Roads 460 and 447. Bottomland fields and woods were inundated. Several cold fronts passed across the region in late May, helping to touch off scattered thunderstorms. A few of these storms were nearly stationary and caused heavy rainfall. Heavy rain in the upper portions of the Mississippi River basin contributed to flooding downriver. SCOTT COUNTY --- BENTON [37.10, -89.57] 05/24/10 12:50 CST 0 Hail (1.00 in) 05/24/10 12:50 CST 0 Source: Law Enforcement SCOTT COUNTY --- 1.0 N CHAFFEE [37.19, -89.67] 05/24/10 13:10 CST 25K Thunderstorm Wind (EG 56 kt) 05/24/10 13:10 CST 0 Source: Emergency Manager An older barn collapsed. The roof of a newer barn partially collapsed. Tree limbs were blown down. Minor damage occurred to two houses, one of which was under construction. The damage was located on Highway 77 near the Cape Girardeau County line.

A few storms pulsed up to severe levels as daytime heating contributed to a strongly unstable atmosphere in the afternoon. Most of the storm development was initiated by outflow boundaries. A mid-level high was positioned over the Mississippi Valley.
